

YOHANNES BELAI

Olney, MD | 443-859-0918 | yohannesbelai4@gmail.com | [LinkedIn](#) | [GitHub](#) | [Personal Website](#)

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript, SQL
- **Backend:** Spring Boot, Spring Security, JPA/Hibernate, Node.js, Express, REST APIs
- **Data:** PostgreSQL, MongoDB, SQLite, Flyway, relational data modeling
- **Testing & DevOps:** JUnit, Spring MockMvc, Maven, GitHub Actions, Docker, Git, GitHub
- **Cloud & Frontend:** AWS Lambda, S3, SQS, React, Vite, Tailwind CSS, Render, Vercel

EDUCATION

Towson University

Bachelor of Science, Computer Science

Aug 2025 - May 2027

Towson, MD

- **Achievements:** Dean's List
- **Coursework:** Operating Systems, Database Management Systems, Data Communications & Networking, Compiler Construction, Data Structures & Algorithms

Montgomery College

Associate of Science, Computer Science

Aug 2023 - May 2025

Rockville, MD

- **Achievements:** Dean's List

RELEVANT EXPERIENCE

Alignerr

Software Engineer, AI Training (Contract)

Aug 2025 - Present

Remote

- Write, debug, and evaluate Java and Python solutions across algorithmic and software-engineering tasks using data structures, algorithms, object-oriented design, and software design principles.
- Identify logic defects, edge cases, security concerns, and performance bottlenecks; recommend corrections that improve reliability, efficiency, and maintainability.
- Design stress tests and edge-case scenarios and review competing implementations for correctness, readability, efficiency, and engineering best practices.

Hamere Berhan Kidus Yohannes (HBKY) EOTC

Software Development Instructor & Technical Mentor (Volunteer)

Jun 2026 - Jul 2026

Rockville, MD

- Mentored 20+ students through the software development lifecycle, guiding design, implementation, debugging, and presentation of mobile applications integrating external AI APIs.
- Provided hands-on support for application logic, API integration, debugging, code review, testing, and systematic troubleshooting.
- Developed intermediate Python instruction covering data structures, algorithms, object-oriented programming, modular design, and applied problem solving.

Self-Directed Software Development / GitHub

Software Engineer

Sep 2023 - Present

Olney, MD

- Developed and tested 10+ Java applications spanning data structures, JavaFX desktop interfaces, algorithms, and object-oriented software design.
- Implemented recursive tree algorithms, hash maps, stacks/queues, and doubly linked lists while practicing unit testing and Git/GitHub-based development.

Marian Assisted Living

Volunteer Assistant

Jun 2017 - Aug 2018

Brookeville, MD

- Developed an application to organize and support daily living tasks for elderly residents, translating caregiving needs.
